

4kW solar inverter price uk

Overview

A 4kW solar panel system costs between £6,600 and £8,100 including installation as of October 2025. Equipment usually eats up 70-75% of the cost, while labour covers the rest. The market right now puts 4kW solar systems between £5,000 and £6,500, depending on who installs it and. Save up to £915 on your electricity bills with solar energy! 4kW solar panel systems are best for medium-sized homes with 2 - 3 bedrooms. Power optimisers typically cost £40 each, but need an inverter. A 4kW solar system is the best system size for 3-4 bedroom houses in the UK. The final price depends on your chosen components and where you live. What kind of home do you live in?

A 4kW solar panel system in the UK will produce an average annual output of around 3,400kWh, if it's dealing with typical UK irradiance. This means. On average, a 4kW solar set-up will consist of around 12 to 16 solar panels and is not only a way for homes to adopt renewable energy and play their part in the carbon-free future, but is also a way for households to massively reduce their energy costs and even make money by selling surplus power.
