

# Africa lacks electricity solar power and wind power

## Overview

---

Over 600 million people across Africa still lack access to electricity, even as demand for power surges with rapid population growth, urban expansion, and industrial ambition. While the world talks of energy transitions, much of Africa remains stuck in energy deprivation. Leslie Nelson GE Angola debunks energy myths, revealing opportunities to gain cost advantages by replacing diesel with solar or gas, cutting expenses by 40% or more. Across Africa, the sunlight shines bright and natural resources abound. Yet despite that lies a pressing issue that threatens to stifle the. Despite holding 60% of the world's best solar resources, Africa attracts less than 3% of global clean-energy investment and over 600 million people still lack reliable electricity.
