

# Algeria electric outdoor solar power hub

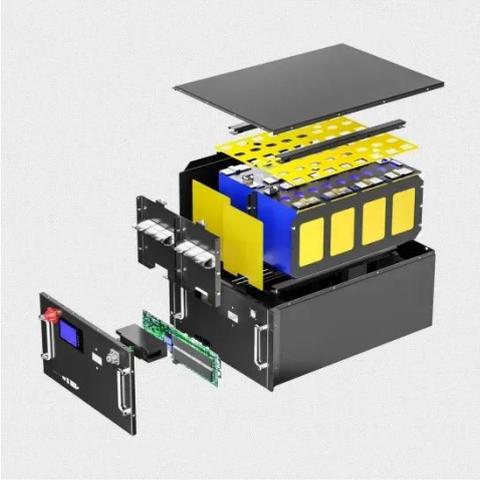

## Overview

---

Algeria is accelerating its energy shift with the construction of a new 220 MW solar park in Biskra, part of a vast 3 GW solar program. This initiative not only promises to revolutionize Algeria's energy sector but also has far-reaching implications for the entire African continent. Algeria has long limited the use of solar to villages in the Sahara, but two large-scale tenders for 3 GW of generation capacity are expected to change that. By including a local content clause, the North African nation aims to build an industry around renewable energy. Author: Martina Markosyan The facilities, located in El Ghrous in Biskra Province and Tindela in El. Leveraging its abundant natural resources, Algeria is focusing on the development of solar energy as part of its energy transition goals. By the end of 2023, Algeria had 437 MW of solar generation capacity installed, but the government has set a goal of reaching a production capacity of 4 GW by. With abundant sunlight and increasing infrastructure projects, outdoor power solutions have become vital for: "Solar-diesel hybrids now power 40% of Algeria's remote telecom stations," reports the National Energy Journal (2024). Solar-Diesel Hybrid Systems Manufacturers like EK SOLAR specialize.
