

# All-solid-state high solar container battery

## Overview

---

This groundbreaking solid state battery replaces the volatile, flammable liquid electrolyte in conventional cells with a solid material, leading to dramatically increased energy density and safety. The battery industry is especially focusing on all-solid-state batteries, which are known for their high safety and outstanding energy density. Experts expect that all-solid-state batteries will overcome the theoretical limitations of lithium-ion batteries, elevating battery technology to a higher. In March 2022, SAMSUNG SDI started its launch of Korea's first all-solid-state battery (ASB) pilot line, a 6,500-square-meter 'S-line', at the SDI R&D Center located in Suwon. In 2023, SAMSUNG SDI supplied samples of ASB produced at the S-line to customers and aims to mass-produce them in 2027. mesh cube/ iStock / Getty Images Plus Samsung SDI made a significant announcement at InterBattery 2024, unveiling. A solid-state battery (SSB) is an electrical battery that uses a solid electrolyte to conduct ions between the electrodes, instead of the liquid or gel polymer electrolytes found in conventional batteries.
