

# Andorra Energy Storage Power Supply Purchase

## Overview

---

Nestled in the Pyrenees Mountains, Andorra has long relied on hydropower and imported energy. But with rising climate goals and energy independence priorities, the country is turning to photovoltaic (PV) power generation paired with advanced energy storage systems. Andorra, a small but ambitious nation nestled in the Pyrenees, is rapidly emerging as a testbed for energy storage solutions that balance mountainous terrain with renewable energy goals. With 90% of its electricity historically imported, the country's push for energy independence has turned energy. The new contract expands on the previous one and includes a Power Purchase Agreement (PPA) that will cover 30% of FEDA's electricity consumption with green energy starting in 2028. It includes an option to expand the connection to 1,200MW. Solar Photovoltaic (PV) in Spain, Market Outlook to 2030, Update 20.
