

# Are wind power from solar-powered communication cabinets considered public goods

 **TAX FREE**    

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

  
**ENERGY STORAGE SYSTEM**

## Overview

---

Per Internal Revenue Code Section (IRC) 168 (i) (10), this equipment must meet the following criteria to qualify as public utility property: Per Internal Revenue Code Section (IRC) 168 (i) (10), this equipment must meet the following criteria to qualify as public utility property: The guidelines contain a general policy, definitions of solar and wind-powered energy devices, examples of different device types, and a description of the manner in which the exemption applies when using the market, income and cost approaches for solar and wind-powered energy devices and the. The U. Treasury Department and IRS on Decem, released final regulations (T. 10015) relating to the investment tax credit (ITC) for energy property under section 48, including rules for determining whether investments in energy property are eligible for the energy credit and for. Two tax credits, the investment tax credit (ITC) and the production tax credit (PTC), directly support investment in wind and solar electric power. In the Congressional Budget Office's baseline projections, those tax credits reduce federal revenues and increase federal spending. The IRS has ruled that a wind power facility is not public utility property (PUP) under IRC Section 168 (i).
