

Australia energy storage equipment procurement

Overview

Australia has taken a decisive step in reshaping its electricity grid, awarding more than 15 GWh of battery energy storage projects in what marks the country's largest procurement round to date. CIS Tender 3 targeted 4 GW/16 GWh of dispatchable capacity in the National Electricity Market (NEM), but saw 124 bids worth around 34 GW/135 GWh bid in. Building. ASL (formerly AEMO Services) has completed New South Wales' (NSW) largest-ever tender for long-duration energy storage (LDES), contracting six new battery projects for a combined 1. The latest round of the Capacity Investment Scheme has secured more lithium-ion batteries than originally targeted and drawn unprecedented market interest. The CIS seeks to support delivery of 23 GW of generation and 9 GW of storage capacity by 2030. Given the potential scale.
