

Australian container solar exhibition hall design

Overview

Housed within specially modified shipping containers, the exhibition incorporates a bold colour scheme, striking imagery, large-scale graphics, and hands-on interactives to deliver the museum's first exhibition in the public domain. Australian National Maritime Museum. our YELLOW WALL is LOT-EK's storefront space, since moving to our new space right on the street, we want to find ways to actively engage the community around us. our YELLOW WALL was born! through rotating showcases featuring works from friends, family, and collaborators, this space invites everyone. At Modbox, we design and build shipping container solar solutions to securely house your solar panels, batteries, inverters, and other equipment. Whether you're powering a remote worksite, an off-grid project, or a backup energy system, our containers are built tough for Australian conditions. "Container" is a free, outdoor, temporary and travelling exhibition, exploring the fascinating history and contemporary impact of the humble shipping container. By incorporating sustainable design strategies, container houses can provide a functional and environmentally friendly space for showcasing products, art, or other exhibits. These innovations have improved ROI significantly, with commercial projects typically achieving payback in 4-7 years depending on local electricity rates and incentive.
