How to Build a Solar Power Station: This Instructable is on how to build a battery power pack that charges from the sun. I built it this past summer to have a portable device that I could run and charge my gadgets on. Shopping List: -12V Battery: You can use almost any 12V battery, if you are using a lead acid battery make sure it is a deep cycle battery. The battery I used: ly/3SKlamu -DC to AC Power Inverter, choose the output you need. to/45hRZ1E -Solar. A power station is easy to build. Whether you're a business owner, a community leader, or an individual interested in renewable energy, understanding how to build a solar power. A solar array large enough to fully cover an entire household's electricity usage requires a pretty hefty investment, and an energy storage system that can provide power overnight adds quite a lot to the cost, so it's out of reach of many people. And of course, those who don't own their own home.
