

Burundi Hydrogen Energy Base Station

Overview

Located in Rumonge Province, southern Burundi, the Ruzibazi Hydropower Station — constructed with Chinese assistance — has become a key driver of the country's clean energy transition. Just like everyone who worked on the plants, we were filled with joy and pride when we saw the first turbine of the Jiji plant turn. The President of the Republic of Burundi today officially inaugurated the Jiji hydroelectric power plant, in the presence of a large delegation of national authorities and representatives of the development partners that co-financed the project. As of 2024 it was nearing completion.
