

Cambodia s new wind and solar energy storage power station

Overview

A new wind battery storage project is slated to further power Cambodia's clean energy journey, with Minister of Mines and Energy Keo Rottanak unveiling the energy project in Kampong Chhnang, calling it an ASEAN leader. In a landmark move to revolutionize its energy landscape, the Cambodian government, under the leadership of PM Hun Manet, has approved 23 power projects with a total investment of nearly USD 5. The decision was made during a cabinet meeting chaired by Prime Minister Hun Manet on September 27 at the Peace Palace. The system uses container-sized batteries to stabilise the national grid, earning recognition from Germany Cambodia's vast renewable energy resources, including solar and wind, offer a path. According to TrendForce, Cambodia is accelerating the development of clean energy to reduce its reliance on imported energy, enhance the country's energy security, ensure reliable and affordable power supply, and help this Southeast Asian nation achieve its goal of having at least 70% clean energy. PHNOM PENH: The Cambodian government on Friday (Sept 27) approved 23 power investment projects totally worth US\$5. 79 billion for 2024-2029, aiming at addressing the shortage of energy sources, said a press release.
