

# Can people live in a house with photovoltaic panels

## Overview

---

Let's clear the air — the overwhelming consensus among scientists and engineers is that solar panels are generally safe. While myths around solar panel radiation risk circulate online, there is no evidence proving that rooftop solar systems cause harm to people living underneath. What I found was a significant increase in rf radiation (from hundreds. Since 2008, hundreds of thousands of solar panels have been installed across the country as more and more Americans choose solar energy for their daily lives. Most concerns stem. Thinking of buying a home with a solar energy system already installed on the roof?

How exciting! Owning a solar-powered home can help you save on your energy bills, reduce greenhouse gas emissions, and be more energy independent. This clean energy source is making the electric grid more dependable while.
