

Can solar panels be directly covered on the roof

Overview

While it's possible to mount solar panels directly using special solar roof hooks, these systems are designed to prevent leaks and maintain the roof's integrity. Whether your home has asphalt shingles, tile, wood, or metal roofing, solar is a smart and sustainable home upgrade. There are two reasons solar panel installers advise against covering an entire roof. Professional Installation is Critical for Safety and Warranties: Solar panel mounting involves working at dangerous heights with structural modifications that can void warranties if done incorrectly. These are called ballast mounts.
