

Can the restroom be equipped with lockers

Overview

Selecting the right locker system involves more than just choosing storage units. Key considerations include durability, layout compatibility, ease of maintenance, and material performance in wet or humid conditions. Inclusive restrooms and locker rooms are intended to provide an equitable experience for everyone, broader accessibility, more efficient use, enhanced supervision and organizational efficiency, and better student health outcomes. This Best Practices guide will address how to discuss key issues. Restrooms shall be assigned as “Restroom” with no gender specific designation. Refer to Figures 1 and placement projects, etc. Gender-inclusive locker/shower facilities shall be provided in buildings that have. Each new building or major renovation project requires the inclusion of at least one single occupancy gender inclusive restroom, as part of the project. The presentation solutions references ADA, TAS, CA Title-24, ANSI 117.
