This EVlink Pro AC product is a wall-mounted charging station for all electrical vehicles compliant with IEC61851-1 standard. It can also be floor-standing, either fixed on a pedestal, or integrated in a kit enclosure. it receives electricity by plugging into the grid and storing it in batteries, consumes no petroleum-based fuel, and produces no tailpipe emissions. Mode 1 of Charging: is a method for the connection of an EV to a standard. The Communications, Space and Technology Commission (CST) and the Saudi Standards, Metrology and Quality Organization (SASO) have announced that the first mandatory phase of the unified charging ports for mobile phones and electronic devices in the Saudi market will be effective on 1 January 2025. EV charging stations are becoming essential infrastructure—similar to fuel stations of the past—paving the way for Saudi Arabia's new economic and ecological narrative. The Saudi Arabia EV Charging Station Market is gaining momentum due to a combination of strategic policy shifts and growing.
