

China s solar power plant investment

Overview

China installed a record 315 GW (AC) of new solar capacity in 2025, lifting cumulative installed PV capacity to 1.2 TW and pushing non-fossil power sources past thermal generation for the first time. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. [2] In 2024, China added 277 gigawatts (GW) of solar power, which. China's approach to renewable energy buildout combines large-scale investment, technological innovation and market reform. China's National Energy Administration (NEA) released its 2025 power sector statistics on Jan. Up to now, POWERCHINA has carried out the. Nearly 70 percent of China's foreign power investments from 2022 to 2023 were in renewables like solar and wind, surpassing fossil fuels for the first time since Beijing started backing power projects overseas in the early 2000s, according to a new analysis from the Global Development Policy (GDP).
