

Comparison of 800mm deep server racks with traditional server racks

Comparison of 800mm deep server racks with traditional server racks

800mm vs 600mm depth racks?

We're using 1070mm deep racks for the most part. It's hard to nicely fit servers we use in to anything shorter. 800mm would be the absolute minimum I would be looking at.

Servers size for rack 800mm deep : r/homelab

800mm is quite a common depth for server racks. If you look at measurements (including rail specs) and mounting instructions, you will see that even the deepest Dell and HPE servers will mount just fine.
