

Costa rica electric vehicle infrastructure

Overview

The EV market is projected to grow from 5,000 vehicles in 2025 to 50,000 by 2030 at a CAGR of 58.7%, fueling demand for infrastructure. With over 400 charging stations, led by state utility ICE and private players like Blink Charging, Costa Rica is a regional pioneer. Costa Rica has reached a new goal in sustainable mobility: for the first time, electric vehicles accounted for more than a quarter of all new registrations in the country. They want to see more EVs on the roads. With a commitment to environmental preservation and a robust infrastructure supporting renewable energy, the nation is setting a benchmark for its regional. Costa Rica continues to lead electric vehicle adoption in the Americas, achieving a record market share of 15. Strategic incentives and a growing model range are driving this success, but challenges in infrastructure and fiscal policy loom ahead.
