

Customs code for aluminum frame of photovoltaic panels

Overview

The applicable subheading for the extruded anodized aluminum solar panel frames and corners will be 8541. Based on the submitted photograph, the frame consists of two long frame pieces and two shorter frame pieces which can be joined together to frame solar panels. This frame assembly is an integral part of the finished solar panels. Image (s) shown above is/are not part of the related US Customs Ruling (CROSS) and placed by FindHS. codes for further clarification. By clicking "Find Related HS Code" button above, you can find 6 digits universal HS Code (which is valid for almost all countries in the world) and declarable codes. Choose an option Alt text (alternative text) helps when people can't see the image or when it doesn't load. Short description for people who can't see the image or.
