

Damascus electricity generation

Overview

The Syrian Ministry of Energy has supplied the capital Damascus with 48 continuous hours of electricity in an unprecedented experiment following 14 years of war and political upheaval. Syrians however have recently been angered by rising electricity prices. Installation of a new power transformer at the Ibn al-Nafis substation in Damascus - J(Ministry of Energy) Several regions across Syria, including Damascus, its countryside, Aleppo, and Daraa (southern Syria), have experienced a noticeable decline in electricity supply in recent days. Syrian women walk past a privately owned electricity generator in the Ain Tarma area, on the eastern outskirts of the capital Damascus (Louai Beshra/AFP) After years of prolonged power cuts, the capital, Damascus, is witnessing a noticeable improvement in electricity service. Although challenges. The Syrian capital received electricity for an uninterrupted 48 hours - an unprecedented development - but people say this has led to prices they can't afford The Syrian government has recently repaired and improved power plants near Damascus, such as the one at Deir Ali [Getty] The Syrian Ministry. Syria's electricity production covers less than one-third of national demand, leaving most areas with only four to five hours of power a day, a senior official has said. Khaled Abu Di, Director, Public Establishment for Electricity Transmission and Distribution, said it needs 6,500 megawatts (MW). A view shows electricity pylons in Kiswah, Damascus suburbs, Syria Septem. Picture taken Septem. After more than a decade-long conflict, the Damascus government is trying to reactivate the power stations again, but it faces numerous challenges, along with technical and.
