

Djibouti new energy storage terminal manufacturer

Overview

Moroccan public works and civil engineering company SOMAGEC is contributing to the building of this oil terminal in Djibouti, Morocco. The construction works of the new oil jetty are underway as part of a large storage platform for petroleum products and derivatives. Launched in 2020 with a foundation-laying ceremony led by His Excellency Mr. Ismaïl Omar Guelleh, President of the Republic of Djibouti, the Damerjog Oil Terminal is a flagship project under Djibouti Vision 2035. Strategically located southeast of the capital, at the crossroads of the Red Sea and Djibouti's state-owned logistics and transportation infrastructure investment vehicle, Great Horn Investment Holding (GHIH), has secured a \$120 million financing package from the African Export-Import Bank (Afreximbank) to implement a series of oil and logistics projects in the Damerjog Industrial. The company's investment in Damerjog Oil FZE, tasked with building, equipping, and operating a new oil terminal at Damerjog, underscores Djibouti's strategic importance as a hub for oil supply to Ethiopia and neighboring countries. Located at the entrance to the Bab-el-Mandeb Strait, this project. The Damerjog Jetty Project is a strategic infrastructure development supporting the region's oil and gas logistics through a modern marine terminal. Designed to handle fuel import and export operations, the jetty plays a vital role in enhancing Djibouti's energy and industrial transport capacity. With 40% annual growth in energy demand since 2020, Djibouti City faces unique power challenges. The 3 km jetty provides access to vehicles and.
