

# Does the photovoltaic bracket need to be inspected when it arrives

## Overview

---

Quick Answer: Solar panels require three types of inspections: a mandatory final inspection for new installations before activation, annual DIY self-inspections, and professional inspections every two years. Before any solar system can be energized, it must clear a crucial milestone: the final inspection. Key items to check include panel surface condition, electrical connections, mounting. Neither section is all-inclusive as this document is simply a tool to aid the inspection process. Once the installation is complete, you can't just flip a switch and start generating power. The contractor or responsible party shall be available t the jobsite and provide proper.
