

Electric vehicle charging infrastructure port of spain

SMART GRID & HOME

Overview

Spain's public electric vehicle (EV) charging infrastructure expanded by 20% in the first quarter of 2025, reaching 46,358 active charging points. Electromaps database contains 16,969 charging stations available throughout the country, making it easier for drivers to power their vehicles on the go. This action is part of the MOVES III - INFRASTRUCTURE COMMUNITY OF VALENCIA programme, promoted. As the deadline for the Alternative Fuels Infrastructure Regulation (AFIR) targets inches closer, Spain faces various challenges on the path to growing its electric vehicle charging infrastructure. Spain would need over 183,900 electric vehicle chargers to meet the European Union's AFIR objectives. Spain is rapidly emerging as a pivotal force in Southern Europe's transition to electric mobility, with its ambitious goals and burgeoning charging infrastructure market. 9% increase since the end of 2024. But the story isn't just about.
