

Electric vehicle costs bulgaria

Overview

Bulgaria currently offers no cash subsidies to help with the upfront cost of purchasing a vehicle. The majority of the vehicles which enter Bulgaria are second hand, the number of EVs coming from Western Europe is expected to jump considerably in the coming years. In Romania, the subsidy stands at EUR 11,000 and EUR 6,400 for a plug-in hybrid, while in Croatia, the amounts are EUR 9,291 and EUR 5,309, respectively. The government was one of a number of countries which opposed the EU's 2035 ban on petrol and diesel vehicles, arguing that the high price of EVs, combined with low incomes and a lack of public charging meant it. The potential introduction of subsidies for the purchase of electric cars in Bulgaria should be in line with the spending priorities of the state and the actions to achieve fiscal consolidation of the budget, according to Finance Minister Temenuzhka Petkova, who took part in Question Time in. The considerable price premium of electric vehicles – mainly caused by the high cost battery system – remains the major drawback of electric vehicles. Only if considerable cost reductions can be achieved in the future, electric vehicles are likely to penetrate the automotive market at relevant.
