Almost 14 million new electric cars were registered globally in 2023, bringing their total number on the rise. Today, electric cars often have a lower total cost of ownership than ICE cars over the vehicle lifetime, due to reduced fuel and maintenance expenses. However, reducing the purchase price gap will be key to broader uptake. In Europe, for example, respondents to a 2023 survey by the European Automobile Manufacturers Association (ACEA) reported that the total cost of ownership of electric vehicles is lower than that of internal combustion engine (ICE) vehicles. The Global EV Outlook is an annual publication that reports on recent developments in electric mobility around the world. It is developed with the support of members of the Electric Vehicles Initiative (EVI). Charging networks are expanding. How do electric vehicles stack up against their conventional counterparts in terms of total cost of ownership for consumers?

To answer this question, we consulted the Car Cost Calculator of the German automobile club ADAC, a free online database that contains comprehensive cost data.

Electric vehicle costs transnistria

The Bottom Line of Electric Cars

In light of such forecasts and associated debates, we aim to show how electric vehicles currently compare with ICEVs in terms of costs, and how far electric vehicles are from price parity.

Stellantis's Shift Away From Electric Cars Will Cost It \$26 Billion

The company, which owns Chrysler, Fiat, Jeep and Peugeot, is changing its strategy to gasoline and hybrid vehicles in an effort to revive weak sales.

Electric vehicle costs transnistria

As of 2025, driving 100 km in an electric vehicle costs an average of EUR2.70, compared to over EUR10 for a comparable gas or diesel car. That's nearly four times cheaper for the same trip.

Trends in electric car affordability - Global EV Outlook 2025

Electric car affordability improved in all car segments in China thanks to falling battery pack prices, a high level of supply chain vertical integration and fierce competition within the Chinese EV market.
