

Energy storage combiner circuit breaker

Overview

Combiner boxes, fuses, and breakers work together to protect your solar system by managing wiring, preventing overloads, and ensuring safety. The System Shutdown Switch (EP200G-NA-02-RSD) is an accessory for the Enphase IQ System Controller 2 (EP200G101-M240US01), IQ System Controller 3 (SC200D111C240US01), IQ System Controller 3G (SC200G111C240US01), and IQ System Controller 3M (SC200D111CMC1US01). The switch is wired to the IQ System. A PV combiner box takes the output from several strings of solar panels and combines them into one main feed. For any system with more than three strings, a combiner box is a practical necessity. It integrates PV circuit breakers, revenue-grade metering, and the IQ Gateway communications unit into a single outdoor-rated enclosure, simplifying installation and system. Navigating solar protection starts with understanding combiner boxes, fuses, and breakers—discover how these components keep your system safe and why their proper selection matters. Additionally, it reduces installation time with integrated and pre-wired current transformers for PV and batteries.
