

# Energy storage system caught fire and exploded

**215kWh**

8,000+ Cycles Lifetime

IP54 Protection Degree

## Overview

---

When fire broke out at the world's largest battery energy storage facility in January 2025, its thick smoke blanketed surrounding wetlands, farms and nearby communities on the central California coast. Local fire service project would not be possible without this funding and continued support. The Surprise Fire-Medical Department, Peoria Fire-Medical Department, and Arizona Public Service (APS) supplied requested information and made the personnel who had knowledge pertinent to the incident. A few weeks ago, a fire broke out at the Moss Landing Power Plant in California, the world's largest collection of batteries on the grid. Some residents in the area have reported health issues that they. A battery energy storage facility that was built inside an old power plant burned from Jan.
