

# Extra-large capacity solar-powered containers for oil refineries

## Overview

---

This paper proposes a solar-assisted method for a petrochemical refinery, considering hydrogen production deployed in Yanbu, Saudi Arabia, as a case study to greenize oil refineries. A validated ASPEN HYSYS model w. Can solar energy drive crude oil refineries?

Employing solar energy to drive crude oil refineries. oil refineries to decarbonize their operation. The applicability and feasibility of introducing a concentrated solar power (CSP) system to reduce partial reliance on process heaters of a crude oil refinery was studied by Danish et al. in Texas powers pumps, saving \$50,000 yearly. Solar panels lay flat on the ground. This position ensures maximum energy harvest containers to build large-scale grid-lithium battery storage (100-500kWh) and smart energy management.
