

# Finland solar power station energy storage subsidies

## Overview

---

The European Commission has approved a €2.3 billion Finnish state aid scheme aimed at accelerating investments in renewable energy, energy storage, and industrial decarbonization. The growth of solar power in Finland is set to reach a new milestone, with total capacity expected to surpass 251 MW by mid-2025. 6 million in subsidies for large-scale solar projects over 1 MW, a move designed. The aim of the subsidy scheme is to promote energy investment and energy infrastructure projects that are in line with the Sustainable Growth Programme for Finland and that reduce greenhouse gas emissions in Finland and support the country's 2035 carbon neutrality target. These projects also contribute to Finland's carbon neutrality goals. What is the funding for?

. In Finland, the Energy Authority is responsible for the implementation of the EU renewable energy policy and the national renewable energy policy.
