

# Foreign energy storage supply system

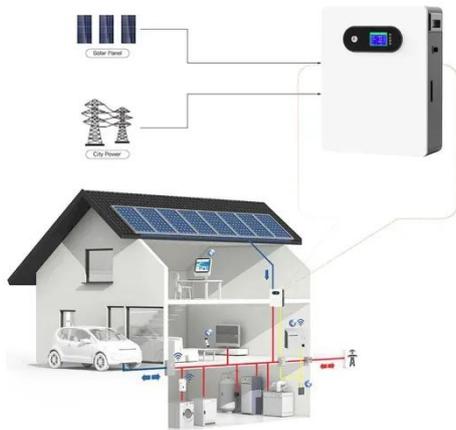

## Overview

---

FEOCs are companies that are owned, controlled, or significantly influenced by foreign adversaries, including governments or organizations from countries like China, Russia, Iran, or North Korea. FEOC rules are reshaping energy storage and the stakes are high. If your BESS supply chain includes restricted foreign entities you risk losing ITC eligibility. Among other changes, the bill accelerates solar and wind phaseout dates: projects must be placed in service by the end of 2027 or begin. The looming threat of Foreign Entity of Concern (FEOC) compliance is set to create stranded energy storage assets by jeopardizing tax credits for projects reliant on certain Chinese-sourced components after 2025. Few risk categories in clean-energy financing of energy storage are as misunderstood. To receive 48E, 45Y, or 45X tax credits next year, battery energy storage systems will need to comply with new restrictions on Foreign Entities of Concern (“FEOC”), also known as “Prohibited Foreign Entities (PFE)”. Following the passage of the 'One Big, Beautiful Bill Act' into law a couple of months ago, whereupon it took the more official legislative. Foreign energy storage technology plays an essential role in the global transition to sustainable energy solutions. Integrating renewable sources into power grids effectively reduces dependency on fossil.
