

# Generator cabinet structure

## Overview

---

Building a DIY generator enclosure is the perfect solution to keep your generator safe and sound. In this guide, we will walk you through the step-by-step process of constructing a protective housing for your generator. Yes, you can build your own generator enclosure—and you don't need to be a master carpenter to do it. Here are three popular styles, each with its own advantages. A lean-to shed is a practical design with a single, sloped roof that is built against an existing structure, like your house or a fence. The roof slants away from.
