

Georgia Wind Power Energy Storage

Overview

Georgia Power is enhancing grid reliability and sustainability through Battery Energy Storage Systems (BESS), supporting clean, safe, and affordable energy for 2.8 million customers while integrating smart technologies like EVs and smart grids. This capability promotes a steady and reliable supply of electricity, regardless of the variability in renewable energy. Georgia Power began commercial operation of the company's first grid-connected battery energy storage system, the 65-MW Mossy Branch Battery Facility, in November 2024.
