

Georgia rooftop solar power system

Overview

The average Georgia homeowner needs a 13.26 kW solar panel system to cover their electricity needs, which comes out to \$32,432 before incentives. While this may sound high, it will pay off. Solar energy systems are wired behind a customer's meter when they are planning to offset their energy usage from the grid. Our goal is to provide you with information to help you make an informed decision on whether or not solar is a good option for your home and the next steps if you would like. Solar photovoltaic systems convert solar energy into electricity. Rooftop solar produces clean, renewable energy, replacing the. Georgia has launched an innovative initiative called Georgia BRIGHT, aimed at providing free rooftop solar systems to eligible homeowners. This program, known as the "No-Cost Solar Plan," was officially unveiled in Atlanta and promises to deliver approximately 400 fully prepaid solar installations. You'll need to install a 13.
