

Global wind energy council 2022

Overview

The Global Wind Report for 2022 was recently published by the Global Wind Energy Council (GWEC). As was made clear at the Glasgow Climate Summit, there is broad consensus on the urgency of promoting rapid and effective decarbonization. It is the definitive guide to the offshore wind industry and includes GWEC Market Intelligence data exclusive to the report. fossil fuels towards renewables. Offshore wind represents a key opportunity for countries to push the energy transition forwards at scale, creating significant national and local jobs and economic growth and jobs, and lowering energy prices, that offshore wind can provide. The last few months. GWEC's Global Wind Report provides a thorough overview of the onshore and offshore wind market globally, using the latest data and providing analysis on forecasts, market growth and emerging markets.
