Overview

Quality 30kW on grid tie solar inverter converts 200-820V DC to 3 phase 208V-480V output voltage, supports 2 high efficiency MPPT tracking inputs. Grid tie inverter 3 phase adopts with transformerless design, LCD, convenient for the user to monitor main parameters and configure. Three-phase grid. While solar inverters are the most common type of inverter used for residential solar, they are just one of several inverter options available for solar and energy storage systems. Both string inverters have high input currents, which enable support of larger PV modules without compatibility issues, better supporting power density. S6-GC30K-LV-US string inverters are suitable for three-phase commercial rooftop PV projects with grid voltage of 240 or 208VAC. SMA's proven integrated rapid shutdown support and reliable DC AFCI.

High quality 30kW grid-connected inverter

Sunway 3-30kW High Voltage Three Phase Hybrid Solar Inverter

This high-voltage solar inverter increases energy independence for homeowners with a flexible power range (3KW-30KW). Compatible with low-voltage (150-800V) batteries for seamless integration.
