

How is the Fengli generator

Overview

It has the unique function of small molecular water clusters, the hydrogen production time is up to 30 minutes, and the two kinds of health care functions can directly set the heat preservation function in the quality inspection at 20 degrees Celsius-100 degrees Celsius. In the three-minute micro-electrolytic hydrogenation manufacturing process, the higher the mineral content in the water, the stronger the electrolytic effect and the higher the hydrogenation content. Quick electrolyzed in just 3 minutes, change the water quality and often accompany. Understanding the different types helps business owners stock models that align with customer demands—whether for emergency backup, continuous operation. These generators are of the synchronous drip proof salient and are very heavy and rugged in construction and easy to maintain. They are built to IEC34, Nema MG1-22, GB755, CSA C22. 2-100, VDE 0530 and ASB59 standards. After completion of the construction process including wire stringing of 1,000 kV.
