

# How to apply for approval of photovoltaic bracket

## Overview

---

Before you go solar, you'll need to file for a permit approving your project. Solar permits typically require approval on two forms—one from your local building authority (to approve new construction), the other from your electric company (to approve interconnection to the grid). What is a solar permit?

A solar permit is a document issued by local municipalities allowing individuals or businesses to install solar panels and PV systems. Solar permits are required in. Automated permitting is revolutionizing the industry: SolarAPP+ now provides instant permit approval in 275 jurisdictions across 13 states, reducing processing time from weeks to minutes for standard residential installations. Following the installation, a professional from the local government. Whether you're an installer trying to improve your project turnaround time or a homeowner curious about what's involved, we'll walk you through the process, step by step.
