Always use #6 AWG bare copper wire for outdoor grounding to meet National Electric Code requirements and. Grounding (also known as earthing) is the process of physically connecting the metallic and exposed parts of a device to the earth. This process involves two distinct but related concepts: system grounding, which connects current-carrying conductors to the earth for voltage. Properly grounding your solar panel system is crucial for both safety and performance. The 2020 National Electrical Code (NEC) Section 250. 8 sizing methodology using Solectria inverters.
