

# How to fix the photovoltaic panel not lighting up

## Overview

---

Most solar light failures are caused by dirty panels, dead batteries, or water damage. For persistent issues, reset sensors or check wiring connections. The lifespan of solar lights' rechargeable batteries is typically 300-500 charges, and a decrease in light duration can indicate it's time to replace them. ' /> To restore functionality to a solar panel that shows no signs of illumination, one must follow several systematic steps. Check your solar panel first—nine times out of ten, dirt, leaves, or shade are blocking the sunlight your fixture needs to charge. I learned this the hard way when my entire pathway lighting system “died” last fall, only to discover a thin film of pollen had cut charging efficiency by 70%.
