

# How to use the photovoltaic panel radiation measuring instrument

## Overview

---

Solar irradiance is measured using a meter such as the Fluke Wireless IRR2-BT or Fluke IRR1. This instrument measures the solar radiation that hits its surface from a 180-degree field of view. Over time, its daily or monthly value helps us in evaluating the financial feasibility of going solar in that location. This measurement underpins climate science, environmental monitoring, and, of course, renewable energy.
