

Huawei s large energy storage vehicle application scope

Overview

Huawei has developed solid-state battery tech that could make EVs go further and charge faster. Chinese patent application says the new battery pack could be fully recharged. Huawei's patent application reveals that its battery uses a method of doping sulfide electrolytes with nitrogen to reduce side reactions at the lithium interface. We invest about US\$1 billion annually in research and development related to autonomous driving technologies. Autonomous vehicles will produce broad social benefits. Smartphone giant and EV investor Huawei has challenged CATL and BYD's supremacy by inventing a pioneering new battery that blends an incredible range of up to 3000km with a charging time of just five minutes. Taking the battery-making industry by surprise, the fresh filing is for a solid-state.

Huawei s large energy storage vehicle application scope

Huawei's huge battery breakthrough! New solid state tech promises

Smartphone giant and EV investor Huawei has challenged CATL and BYD's supremacy by inventing a pioneering new battery that blends an incredible range of up to 3000km with a ...

Huawei Patents Battery Tech With 3000km Range & 5 Min Charge

Huawei has filed a patent for a groundbreaking sulfide-based solid-state battery, marking a bold move into the next generation of electric vehicle (EV) energy storage.

LiFePO₄ Battery,safety

Wide temperature: -20~55°C

Modular design, easy to expand

The heating function is optional

Intelligent BMS

Cycle Life:≥ 6000

Warranty:10 years

Huawei Patents EV Battery Offering 3,000 km Range

Chinese tech giant Huawei has filed a patent for a next-generation solid-state electric vehicle (EV) battery that claims to offer an unprecedented driving range of over 3,000 kilometres on a ...

China's tech giant claims 1,800-mile range for solid-state EV battery

By pursuing solid-state battery development, Huawei joins a growing list of global automakers and tech companies such as BMW, Mercedes-Benz, Volkswagen, and BYD, all racing to

...

Huawei patents a new solid-state battery with 1,860 miles range

Even though Huawei doesn't manufacture batteries, the company is putting plenty of R& D resources into developing a new solid-state battery tech. The newest patent reveals a battery pack that can go for ...

Smart, self-driving cars

Huawei provides smart components and systems for autonomous vehicles, helping manufacturers produce cars that are better, safer, and cleaner. Click here to learn about the capabilities of Huawei's ...

Huawei Patents 3,000km Solid-State Battery with 5-Minute Charging

Huawei has intensified its ambitions in advanced energy storage by patenting a sulfide-based solid-state battery capable of achieving driving ranges of up to 3,000 kilometres and ultra-fast ...

Breakthrough EV Battery Patent Could Charge In Minutes And Cross ...

Huawei has developed solid-state battery tech that could make EVs go further and charger faster. Cells have triple the energy-density of li-ion ones and could theoretically give an 1,800 ...

Huawei says its new solid-state EV battery can give you

Huawei is the latest in a growing list of automakers and tech companies that are exploring the possible benefits of fitting an EV with solid-state batteries, with the likes of BMW, Mercedes-Benz,
