

# Iceland's lithium battery energy storage method

## Overview

---

New research coming out of the University of Iceland introduces the novel idea of adding EES technologies such as Lithium-ion batteries across the country's grid to store its 100 percent renewably sourced electricity, effectively creating the world's first renewable "green battery. ". That's exactly what the Reykjavik lithium battery energy storage power station aims to achieve. Unlike traditional battery installations, this project uses liquid-cooled. Welcome to Iceland's latest energy storage policy saga - where geothermal steam meets cutting-edge battery tech in a nordic dance of innovation. As of 2025, Iceland's updated strategy is making waves far beyond its icy shores. Learn about key factors for successful bids and industry data. Why Iceland's Energy Storage Market Matters Iceland, a global leader in rene. in the green transition of industry. At \$300 million, the project clocked in at \$450/kWh.
