

Install photovoltaic panels and install elevators for free

Overview

The short answer is no, you can't get free solar panels from the government. That being said, there are many incentives put in place by the Federal Government to help homeowners transition to solar energy to power their homes. However, the federal government does not offer any programs for free home solar panel installations nor does the government require companies to grant. Companies that offer “free” solar panels are typically offering solar lease agreements, so you can reap the benefits of solar-powered electricity without dealing with the upkeep and maintenance of the panels. “I have never seen an advertisement offering free solar that is not a lie,” Neil Gallagher of Brighterway Solar, a solar installation company in Florida, told us. These initiatives typically come in the form of grants, tax credits, rebates, and low-interest loans designed to reduce the cost of going solar. Solar panel installation costs range from \$15,000 to \$30,000 for an average American home, with a payback period of 6 to 10 years depending on your state's incentives and sun exposure.
