

# Is a home inverter cost-effective

## Overview

---

They're generally the most cost-effective option, making them budget-friendly for homeowners just starting their solar journey. Their simple design means fewer components that could potentially fail, resulting in lower maintenance needs over time. On average, a complete home power inverter system costs between \$3,000 to \$10,000. As energy costs continue to rise, choosing the right inverter has. However, you can also get an inverter prepackaged together with a charge controller, battery and other components by buying a solar generator. The difference between string, micro, and central inverters.
