Overview

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. NLR's PV cost benchmarking. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7. System size, panel type, and labor needs are the biggest cost drivers, along with your roof's condition and any upgrades. Solar panels can sharply reduce your monthly energy bills.
