Is it safe to install solar panels on the roof to generate solar power

Overview

Let's clear the air — the overwhelming consensus among scientists and engineers is that solar panels are generally safe. While myths around solar panel radiation risk circulate online, there is no evidence proving that rooftop solar systems cause harm to people living underneath. Solar panels offer a compelling mix of environmental benefits and financial incentives. Concerns about leaks, voided warranties, or long-term structural damage are common. They provide a clean, renewable energy source that can reduce monthly utility bills and even increase your home's value.
