Is rooftop solar power harmful

Overview

Let's clear the air — the overwhelming consensus among scientists and engineers is that solar panels are generally safe. While myths around solar panel radiation risk circulate online, there is no evidence proving that rooftop solar systems cause harm to people living underneath. Little do people know that solar energy systems can be dangerous to their health, due to the EMF's emitted. Just one of scores of health impacts can be increased cancer risk. EMF stands for manmade "electromagnetic field (s)", such as produce unnatural electric, magnetic, or rf (microwave). Solar power has continued to grow in popularity and drop in cost, meaning many of us are weighing up the pros and cons of installing photovoltaic (PV) panels on our roofs.

Is rooftop solar power harmful

Solar Panels on Your Roof: Is it Safe For Your Health?

If you're questioning the safety of solar power, we are here to reassure you that it is completely safe to have solar panels on your roof and there is no research or studies that indicate ...
