

# Is there solar power in the playground

## Overview

---

Solar panels on playgrounds catch this energy and turn it into electricity to power lights, games, and even charging stations for your phones. It's like having a superpower for your playground!. Discover how solar-powered playground equipment makes playtime fun, safe, and eco-friendly! Learn about cool, green tech for parks. Ever imagined a playground that's not just fun, but also powered by the sun?

I know, right, it's like something out of a sci-fi movie, but it's real! We're talking. These solar poles are not just a step towards sustainability; they're a leap in enhancing children's play experiences while respecting our planet. Shining light in a downward trajectory from atop the equipment, PlaySoleil illuminates playgrounds, discouraging unwanted after-hours activity without the need to. This August, 2024, we built our first No-Wall Playground-“Playground without Walls” in Haikou's Binlian New Village, Hainan Island, China. Together with local kids from the urban village, we designed and constructed these structures, which can be quickly assembled and disassembled—like an oversized. Remember when you were a kid, and the only thing that could tear you away from your favorite playground was the setting sun?

Well, those days might be changing, thanks to an unexpected hero: the solar battery. However, these spaces can be underutilized, especially after dark when visibility is limited. Installing lighting systems in parks and playgrounds can significantly improve safety.
