

# Italy Project Energy Storage Power Station

## Overview

---

Italy's Ministry of the Environment and Energy Security (Mase) has issued final approvals for five new battery energy storage system (BESS) projects, paving the way for 361 MW of new capacity to be added to the nation's grid. The largest project, a 160 MW facility, will be built in the municipality of Tuscania. The investment in storage aligns with the capacity market and the first MACSE auction, scheduled for September 30. Rondissone, Italy - Trina Storage, the global energy storage solutions provider and a business unit of Trinasolar, has signed its first large-scale battery energy storage project in Italy with Aer Soléir, an Irish company based in Dublin specialized in the development, construction, and management. Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia. The storage network like blood, which transports, stores and distributes this energy throughout the body. In a cycle that allows energy to flow. When Italy flipped the switch on its first grid-scale energy storage facility in 2023 near Milan, it wasn't just local engineers doing cartwheels. This 35MW lithium-ion battery system - about the size of three football fields - answers three critical questions: How does a country with 18% of its.

## Italy Project Energy Storage Power Station

---

### **NHOA Energy Commissions a 50 MWh Energy Storage System in Sicily**

Developed for ERG, a leading international independent renewable power producer, this project marks a major milestone in the deployment of large-scale storage systems supporting grid ...

---

### **BESS plants for a more flexible power system , Enel Group**

In the first three months of 2025, five new battery storage plants went into operation, bringing the installed capacity of our battery energy storage systems (BESS) in Italy to 1 GW.
