

Italy downgrades PV module exports

Overview

Since Aug, Decree “MASE No. 220/2025” has been in force, providing a special procedure for photovoltaic systems with capacity over 1 MW using “non-Chinese” components. The Fer X Transitorio decree excludes photovoltaic systems with modules, cells, and. It is the first measure, not only in Italy but also in Europe, that excludes photovoltaic panels and their components manufactured or assembled in China from the tenders. The second tranche of incentives of the transitional FerX decree kicks off these days: the Ministry of the Environment has. The procurement exercise, the second solar auction under Italy's Fer X incentive scheme and first to exclude the use of Chinese solar modules, cells and inverters for projects above 1 MW in size, concluded with a final average price of €0. From pv magazine Italy Italian energy agency. At the end of August this year, the Italian government announced the implementation of the "FerX Transitional Decree," excluding Chinese-made photovoltaic products and components from incentive measures. Carlo Pelanda, economist and expert on Asian affairs.

Italy downgrades PV module exports
